Software Developer • UX • Data Analytics

Software developer with experience building enterprise web applications, with a strong focus on frontend development. Throughout my career I have worked across multiple technologies, complementing software development with knowledge of UX and data analytics. I enjoy solving problems through technology, choosing the most appropriate tools for each challenge.

Technologies & Skills

- Frontend: React, Angular, JavaScript, TypeScript
- Backend: Node.js, NestJS, Java, Spring Boot
- Databases: MongoDB, SQL
- Design: Figma, UX design, Prototyping
- Data Analytics: Power BI, Excel
- Languages: Spanish (native), English (C1), Italian (B1)

Professional Experience

SOFTWARE DEVELOPER • FREELANCE (2023 – Present)

- Developed web applications using Angular, Node.js and Java (Spring Boot).
- Designed and implemented REST APIs, MongoDB integrations and AMQP messaging solutions.
- Created user interfaces, prototypes and user flows using Figma.
- Contributed to software projects with a focus on product development and user experience.

FULL-STACK DEVELOPER • KOVIX (2021 – 2023)

- Developed and maintained a Warehouse Management System (WMS) for one of Argentina's leading retail companies.
- Developed backend services using Node.js and NestJS, and frontend modules using Angular and React.
- Implemented REST and SOAP integrations with external systems.
- Worked in Agile teams using Scrum and Kanban methodologies.

Featured Personal Projects

WHERE GREEN BEGINS • Major Jam 8: Wonder

Ranked 25th out of 112 entries in the Concept category. Designed and developed the game from concept to release using Unity.

TOILET SURF CHAMPIONSHIP 2026

Designed and developed the complete game, including a global online leaderboard powered by Google Apps Script and Google Sheets.

FIREFOX ADD-ONS

Designed and developed browser extensions to improve the YouTube user experience.
